MEMORANDUM FOR: Chief, Atomic Biological Chemical Division, OSI

25X1 ATTENTION: [redacted]

FROM: Chief, CI/PID (WEB)

SUBJECT: Search for Activity Related to Atomic or Missile Production Near Chung Wei, China

REFERENCES: (a) Requirement C-SI-3-[illegible]
(b) CI/PID Project C 9[illegible]

1. This memorandum is in response to your requirement dated 27 June 1963 requesting a search of the Chung Wei area, China, for any atomic or missile related activity.

2. A thorough search of [redacted] 25X1
25X1 [redacted] within a 25 mi radius of the Chung Wei SAM Site (37-54N 105-17E) revealed no indications for atomic or missile production, development, or testing activity. However, about 35 mi southeast of the SAM site, in the vicinity of Hua-P'o on the Ching He, is an area of low activity consisting of the extension of the mud flats and ground scarring. The nature of this activity cannot be determined at this time and scattered clouds and haze over the area prevent a detailed interpretation. The coordinates of this activity are 37[illegible] 204-53E. This project has been coordinated with PID/ACC Branch. Enclosed find DIS 383 which locates the SAM site, the search area, and the area of activity southeast of the SAM site.

3. The [illegible] analysts on this project were [redacted] 25X1
25X1 [redacted] and they may be reached on extension [redacted] 25X1
should you have further questions regarding this project.

4. This project is considered to be complete.
